Leader Board

## Leader Board Policy

The following will be the policy for the final leaderboard:

- 1. To be eligible for winning, participants should have made predictions for at least 35 matches.
- 2. We will be considering the total error from a match for the calculation.(Here total error = absolute error made in inning1 + absolute error made in inning1
- 3. After 35 matches, we will sort the total errors and take the best 35 (the lowest error made in 35 matches) to decide the leaderboard position.
- 4. The final leaderboard will contain the ranks as per the total error made in all the matches so far (considering only those who have participated in a minimum of 35 matches)

nk	Team Id	No Of Matches Predicted	Total Error
